

# P2 Roundtable Teleconference

## April 28, 2006

### ***Participants***

Javier Ballf – EPA  
Annette Smith – EPA  
Audree Miller – ADEQ  
Susan Roothaan – Nurtured World  
Michelle Vattano – NMED  
Chris Campbell – WERC  
Dianne Wilkins – ODEQ  
Thomas Vinson-Peng – Zero Waste

### ***Action Items***

From El Paso Meeting

- Javier to check with Mellissa Gaylon about including a link to Zero Waste on case studies.
- Javier to pass feedback from roundtable to RCC
  - No source reduction on grants
  - Would it support green chemistry
  - General discussion of too many voluntary programs, not working together.
- Dianne to get a list of Oklahoma industries that may write a letter supporting NPPR's efforts.
- Thomas to get measurement input/output and guidance document

JAVIER

Anything to add here?

From 4/28 teleconference

- Susan to summarize results from El Paso workshop visioning exercise
- Thomas will take the lead on an August agenda. Thomas agreed to have a solid draft of the agenda by May 26. The group agreed to talk in Atlanta about it.
- Audree will coordinate a dinner arrangements, and green building tours for Heifer Intl. and Clinton Library.

- Audree will see if she can find a site for a visit on May 9-10; Michelle suggested a hospital. Audree will try to find a hospital.

### ***Update on Site Visits***

The group reviewed the Site Visits and training and discussed how to incorporate training on site visits into our meetings. The discussion centered around site specific information. We also discussed different ways of incorporating SAV's into the P2 Roundtable, to encourage participation and to increase the knowledge of participants. Some ideas included:

- Slides based training
  - What to look for,
  - what to bring,
  - tips etc...
- Site Visits
  - These would

Susan summarized the vision statement and said she would summarize the results of the exercise we did in El Paso.

### ***Atlanta Natl. Environmental Partnership Summit***

Chris led the discussion on the NEP presentation. Dianne will do a Baldrige presentation; Thomas will cover ISO, and then compare the two systems. Susan will discuss performance based audits. State case studies will give each state partner 7-8 min each to discuss their specific programs. Chris concludes with a discussion on Audree's programs. 10-15 minutes to Q&A, ask the audience for their input, experience, ISO/Baldrige or both.

We will be meeting Monday night,

- Reception from 5-7
- Meet approximately 6:30 to touch base.
- We will combine all our presentations onto a disc, then give to AV people.

Optional group agreed to meet informally Thursday morning.

### ***August Roundtable***

Javier invited Anne Good and several other people from various organizations. Marilyn May, of Kaufman County also expressed interest in attending.

The group discussed the idea of doing a Site Visit as part of a joint training for facilities. Dianne could lead a site visit, if we do it. Thomas would need to organize around his teaching schedule. The idea is to pick a few leads from proactive pretreatment programs.

## ***Updates***

**Zero Waste** - Thomas had a presentation on April 27, 2006 to a group of elected officials and other stakeholders in Fayette county to teach them about the principles and practice of Zero Waste. The group is exploring how to use Zero Waste (which includes source reduction strategies) to decrease pressure on expanding landfills.

**EPA** - Javier will have to combine roundtables with site visits and grant reviews. Did one grant review with TMAC. TMAC is working with a facility that is making microcircuits. They had a series of factories in a box.

**WERC** - Chris was in a panel that was looking at Native American aspects of the Clean Water Act. Many of the tribes are struggling with CWA. He incorporated P2 and some of WERCs' P2. Javier asked if they wanted to apply for P2 funds; Chris said they are always included in NMED/WERC grants. He didn't know if they wanted direct support.

Susan was wondering if we could talk about the Mexican training New Mexico is conducting.

**ADEQ** - Audree attended LEED certification training at Heiffer Intl.

**NMED** - Michelle said she did P2 training in Gallup for spray painting. She had quite a few NMED people so they got a lot of work done on P2 integration. She was also partnering with OSHA. OSHA included ideas for training and publications. They wanted to present this in another part of the state. She and Chris sent out information on the Consumer Workshop to her mailing list.

**Nurtured World** - Susan is doing a pilot project for middle school teachers for middle school teachers on the June 15<sup>th</sup>, 2006. Teachers in the district will get a \$100 stipend for completing the course and providing feedback.
